About me

I am confident in myself to give my very best performance in the projects that I may be in part off in the future, from the knowledge I have attained from the time I spent self-study also from the projects I have done in institute and from my personal project, I am willing to improve my knowledge if needed to improve my work performance.

Projects

GitHub Repository

<https://github.com/NandhagopalTS?tab=repositories>

Quiz

<https://github.com/NandhagopalTS/UOT-Quiz-Project>

It is simple quiz project in which Admin can sign-up, login, add questions, update questions and delete if not needed and User can also sign-up, login, and shows individual questions and shows the result after all the questions ends.

In this project I have used MongoDB, hbs, Tailwind, and also used MongoDB aggregate pipeline to retrieve the data.

Other Projects

My Other Projects are:

1. Nodemailer Application to send email.
2. A chat Room using SocketIO as ChitChat Room.
3. A Image Uploading demo website using multer as "Canvas Gallery".
4. Data Migration of Excel CSV to my MongoDB database.

Education

MERN Stack

Unique Occassion Tech

I am currently pursuing my MERN Stack.
